Stomatologická chirurgie / Oral surgery

1. a) Contracture of the jaw muscles
b) Local anaesthesia
2. a) General anaesthesia (indication, preoperative examination)
b) TMJ diseases
3. a) Indications and contraindications of tooth extractions
b) Jaws fractures in children
4. a) Complications of the extractions
b) Carcinoma of the maxillary sinus
5. a) Complications of the local anaesthesia
b) The inflammation of the tongue and of the floor of the mouth
6. a) Retromaxillary abscess
b) Mordex apertur (open bite)
7. a) The etiology and clinical course of the stomatologic inflammations
b) Microgenia, laterogenia and progenia mandibulae
8. a) Osteitis and osteomyelitis of mandible and maxilla
b) Prognathia and retrognathia
9. a) Emergencies during surgical interventions and anaesthesia
b) Luxation of the mandible
10. a) Oro-anthral communication
b) Tumors of the salivary glands
11. a) Specific inflammations in the orofacial region
b) Preprosthetic surgery
12. a) The enlargement of the cervicofacial lymphnodes (the differential diagnosis)
b) Sialolithiasis
13. a) The inflammation of the submandibular and submental region
b) Pathologic fractures of the jaws
14. a) Benign tumors and false tumors of the oral cavity
b) Dentitio difficilis esp. of the lower third molar
15. a) Precancerous lesions
b) Dental implants

16. a) Malignant epithelial tumors of the oral cavity and jaws
b) Reposition and fixation of the jaw fragments
17. a) General principles of treatment of the malignant tumors
b) Fractures of the zygomatic bones and arches
18. a) Inflammation of the salivary glands
b) General complications of the jaw fractures (traumatic shock)
19. a) Surgical interventions complementary to the conservative treatment of the teeth
b) General symptoms of the jaw fractures
20. a) Cysts in the orofacial region
b) Ankylosis of the TMJ
21. a) Plantation, implantation and transplantation in stomatology
b) Maxillary sinusitis odontogenous
22. a) The principles of oncologic prevention and rehabilitation
b) The healing of the jaw fracture and its disturbances
23. a) Pains in the oral cavity and the face (trigeminal neuralgia, facial nerve paresthesia)
b) First aid and transport during facial injuries
24. a) The oncologic diagnosis in the orofacial region
b) The classification of the jaw-bones fractures
25. a) Odontogenous tumors
b) Polytraumas
26. a) The carcinoma of the tongue and of the floor of the mouth
b) The surgical treatment of the jaw fractures
27. a) Malignant mesenchymal tumors of the orofacial region
b) The managing of the injured soft tissues of the orofacial region.
The prevention and the treatment of the tetanic infection
28. a) The classification of malignant tumors
b) The injury of the teeth and of the alveolar process
29. a) The lip carcinoma
b) The surgical treatment of detained and semidetained teeth.
