Brief Yearly Report on Activities of the Academic Center for Healthcare Quality in the period between 01/2016 - 12/2016

Center founded in Brno, 21.02.2011

PROJECTS

Project: Advanced Training and Life Long Learning Program in Applied Health Sciences - AtHeal

Investor 1: EU
Program Framework: TEMPUS

Summary in English: Advanced Training and Life Long Learning Program in Applied Medical and Health Sciences is focused on innovative training methods for the improvement of accountability, quality and safety of professionals working in the area of applied medical and health sciences. The purpose of the project is to jointly reform and modernize a flexible inter-disciplinary training and professional life long program and diploma (LTP) in applied health sciences. A flexible training and diploma was issued by the partner institutions offering the integrated study program. It is a Lifelong Learning Program to enable people at all stages of their lives to take part in stimulating learning experiences and helping to develop strong institutional and individual capacity building across Southern Neighbouring Area (ENPI South). MASARYK UNIVERSITY COMMITMENT 1. Participate in SWOT analysis, 2. Supervision of the project plan implementation, 3. Assisting LNU, 4. Hosting a CM and training workshop, 5. Receiving mobility staff, 6. Cooperation with other partners to achieve the objective of the project, 7. Participation in the planning, monitoring and management of the project.

Project successfully finished, on October 19th. 2016 the Lebanon University in Beirut announced the Masters Program in “Applied Health Sciences”

http://www.ul.edu.lb/media/announcements/default.aspx?facultyId=0&announcementId=4471&lang=2

The Program consists of the following modules:

09. 2014 – 11. 2015 (prolongation 06/2017)
Investor 1: EU
Program Framework: EC tender

Summary in English: The main project outcome is to put in place a framework for action to enhance self-care at EU level and develop strategies to support the broader implementation of effective self-care by producing: - Guideline on the promotion of Self-care - Guideline on the development and production of communication tools - Proposal for policy actions and collaboration on self-care at EU level - Creating a platform of experts Objectives shall be achieved by: 1. A cost/benefit analysis of patient self-care oriented health systems in the European Union and the current frameworks in place to enhance self-care oriented health care systems and patients’ empowerment. 2. Transferability of best practices 3. The creation of a platform of experts in self-care and healthcare Objectives 1) and 2) will be carried out by a separate contractor, see EAHC contract N°EAHC/2013/Health/26. This tender contract concerns setting up and running the platform of experts in self-care, i.e. objective 3).

The final Conference will be held 17.03.2017 in the International Auditorium. Program available at http://www.selfcare.me/?page_id=20 with main content related to:
- Scenarios for the future of Self-Care systems in Europe
- Guidelines for Self-Care, Communication Tools, and Proposals for policy actions and collaboration.
With the contribution “A healthier Europe – perspectives and policies “ by the Director of DG SANTE Mr. John Ryan.

Project: Standardy léčebných postupů a kvalita zdravotní péče (published by Dashofer)

Projects in development stage:

Development of Educational Centres in Medical Informatics (DECeMI)
Investor 1: EU
Program Framework: Call: EAC/04/2015 (KA2: Cooperation for innovation and the exchange of good practices - Knowledge Alliances)

Summary in English: Biomedical and Medical Informatics (BMI) is a very dynamic field undergoing rapid evolution during the last decades. Advances in this research area lead to a radical change in the way health care is delivered today. During the last decade there has been an impressive trend to create new courses and the number of higher education institutions in Europe offering a BMI degree, both at graduate and undergraduate level. The increasing interest on BMI education and training is related to
the fact that it addresses 3 growing sectors concerning employment: Health, IT and Research. Cooperation will provide a contribution to the modernization of higher education in Ukraine and will enhance the networking among higher education institutions and enterprises across EU and PC. Centers will cover two target groups of medical professionals - students, health practitioners-trainees and two target groups of technical professionals – students, IT-engineers. Students will be provided with all necessary teaching materials in published and electronic form. Health practitioners and IT-engineers will be able to improve their knowledge and skills or to gain new knowledge in modern aspects of medical informatics.

Training for Medical Education via Innovative eTechnology (MediTec)
Investor I: EU
Consortium lead: Leipzig University of Applied Sciences [HTWK].

Summary in English: The Aim is to support and modernize of medical education by establishment an innovative training center with realistic simulation models in order to improve the training of practical skills and soft skills in medical education for universities in Jordan, Iran and Iraq. Wider objective: - Establishing a training center to train teachers and students on innovative medical technology - Training on innovative technologies in EU universities - Adapting training on innovative technology in teaching process - Enhancement of training - methodical concepts based on modernized training courses - Development and Providing multimedia and materials for training on innovative technologies in universities. Implementation - 2 weeks Training for students in each EU partner countries.

WORKSHOPS / CONFERENCES

Dr. Bourek is a Program Committee member of FRUCT20 (The 20th Conference of Open Innovations Association FRUCT & ISPIT seminar https://fruct.org/conference20)

**

OTHER ACTIVITIES:

Dr. Bourek was appointed as a member of the Expert Panel on Effective Ways of Investing in Health, European Commission Health and Food Safety Directorate-general. (list of the scientists appointed by the Director-General for Health and Food Safety of the European Commission is available at http://ec.europa.eu/health/expert_panel/experts/members_en ). A brief description of the functions of the Expert Panel on Health can be found in Health-EU newsletter 188 - Focus article Expert Panel on Health helps strengthen EU health systems (available at https://ec.europa.eu/health/node/51403_en )

The Head of the Center is Vice-president (ESQH – European Society for Quality in Healthcare www.esqh.net), Executive board member of CEESTAHC - Central and Eastern European Society of Technology Assessment in Health Care.

Dr. Bourek is Editorial board member of International Journal of Health Care Quality Assurance (IJHCQA), International Journal of Reliable and Quality E-Healthcare (IJRQEH)

**

MUDr. Bourek was a Steering board member DG SANTE European Reference Networks (http://ec.europa.eu/health/ern/policy/index_en.htm). Participated mainly in „ERN Assessment Manual and Toolbox „, areas of activities. Key tasks for external experts was to help shape the development of the final manual and toolbox.

1. State of the art mapping report
2. Index and general scheme map of the assessment process
3. Overall assessment process scheme
4. Operational criteria for the eligibility check of Networks and Healthcare Providers
5. Operational criteria for Networks and Healthcare Providers assessment based on the EU legislation
6. Checklist for self-assessment of the applicants
7. Assessment manual and technical toolbox for Networks and Healthcare Providers
8. Assessment manual and technical toolbox for Independent Assessment Bodies
9. Feedback from the Independent Assessment Body(s) workshops x3
The tenderer (PACE-ERN) developed a virtual workspace as a central repository where these products and deliverables can be reviewed.

Also due to well defined admission criteria the Call 2016 outcome was very successful. Approval of applicants: First wave of the 2016 Call

- 24 applications received 370 hospitals and almost 1000 highly specialised units involved
- 26 Countries (25 EU Member States + Norway) involved

On 15 December 2016 the European Reference Network Board of Member States approved the following 23 ERNs: ERn on Rare Bone Disorders, ERN on Rare craniofacial anomalies and ENT disorders, ERN on Rare Endocrine Conditions, ERN on Rare and Complex Epilepsies, European Rare Kidney Diseases Reference Network, ERN on Rare Neurological Diseases, ERN on Rare inherited and congenital anomalies, ERN on Rare Respiratory Diseases, ERN on Rare and Undiagnosed Skin Disorders, ERN on Rare Adult Cancers (solid tumors), ERN on Rare Haematological Diseases, ERN for Rare Neuromuscular Diseases, ERN on Rare Eye Diseases, ERN on Genetic Tumor Risk Syndromes, ERN on Uncommon And Rare Diseases of the HEART, ERN on Rare Congenital Malformations and Rare Intellectual Disability, ERN for Rare Hereditary Metabolic Disorders, ERN for Paediatric Cancer (haemat-oncology), ERN on Rare Hepatological Diseases, ERN and Musculoskeletal Diseases Network, Rare Immunodeficiency, Autoinflammatory and Autoimmune Diseases Network, ERN on Transplantation in Children, ERN on Rare Multisystemic Vascular Diseases.

Several institutions from Brno and Masaryk University have become ERN members.

**

The Center has a member in a ongoing project:

Pilot Project on Promoting Self-management for Chronic Diseases in Europe (PRO-STEP)

Financing: Tender (no. SANTE/2015/D2/021)

Consortium Lead: European Patients’ Forum

Summary in English: Commission Decision C(2013)4940 of 2 August 2013 specified the initial framework for the promotion of self-care systems in the European Union within the scope of self-limiting diseases (minor diseases). By Commission Decision C(2014)4127 of 25 June 2014 the Commission seeks to expand these activities by extending its scope from minor self-limiting diseases to chronic diseases (including chronic conditions and chronic disorders). The consortium brings together organizations with a broad range of expertise in fields and backgrounds relevant for self-care in chronic disease. The consortium is led by a patients’ organization (EPF) and includes representatives of key stakeholders: health education (DCHE), research and implementation (FAD), and health policy (EFHH) as well as translation of knowledge (advisors to the steering committee).

2930.06.2016 Workshop PiSCE (project Sanco/2013/D2/27 – S12.682650) (Platform of Experts), Copenhagen.
